EXPERIENCE

Impactsure Technologies   Mumbai, IN
Software Engineer | Trade Platform Team   Dec 2025 – Present
Products: Trade Platform

- Leading development of a full Trade Platform with consultants; POC for HDFC Bank and demos for SBI, Deutsche Bank, and others.
- Designed the first corporate client-facing React UI framework with reusable components and integrated backend microservices for IRM, ORM, Import/Export Finance, EDPMS, SOFTEX, and BG.
- Implemented Flowable BPMN-based maker-checker workflows across all trade services, managing approval flows.

Associate Software Engineer | Code Excellence Team   July 2023 – Nov 2025
Products: SureConnect, SureEditor, SureSanction, BG Printing, SureMatch-BG

- Worked across multiple banking products to build BPMN-based workflows, secure authentication, and document processing features used in production systems.
- Integrated editor and document comparison features into SureSanction, BG Printing, and SureMatch-BG, now live for SBI, Axis Bank, and SIB.
- Implemented enterprise SSO using Keycloak with LDAP and developed complex Flowable V6 BPMN maker–checker workflows for loan sanctioning, checklist execution, and secure document validation across microservices and workflow systems.
- Served as Technical Lead for BG Printing Phase-1 go-live for Axis Bank under accelerated RBI timelines; led a 5-member team, enabled production rollout for BG inventory and document execution, resolved 10+ critical issues, delivered 5+ change requests, handled nationwide IBG helpline support, and earned Star Team of the Month.
- Led POCs for SureMatch-BG, converting them into production deployments for Axis, SBI, and IndusInd Banks; owned 50%+ of editor integration, a key component of Bank Guarantee vetting process.

Software Engineer Intern | Production Support   Jan 2023 – June 2023
Products: CRM, SureLogistics, SurePlan

- Provided production support across SurePlan, CRM, and SureLogistic for the Gardler Lighting client, resolving 25+ bugs and implementing 20+ change requests, improving system stability and client satisfaction.
- Built multi-vendor RPA-based shipment tracking in SureLogistic, reducing manual tracking effort by 60%.
- Delivered CRM enhancements with mandatory field validations across SureCRM, SurePlan, and SureLogistic, and integrated SurePlan with Tally ERP to sync stock and track finished goods from BOM to production line, improving data accuracy and inventory visibility.

PROJECTS

In-House CRM (SureConnect)   Oct 2023
- Built in-house CRM for production support ticketing using Flowable BPMN and Keycloak SSO, reducing manual effort and improving issue resolution.

Web-Based DOCX Editor & Document Comparison (SureEditor)   Feb 2024
- Built a web-based DOCX editor with track changes, comments, and multi-user collaboration.
- Developed document comparison with side-by-side highlighting (~90% digital, ~80% scanned accuracy) to prevent document forgery; using Apache POI, Paddle OCR, and Diff Match Patch Algorithm; integrated into SureSanction, BG Printing, and SureMatch-BG (live for SBI, Axis, SIB).

EDUCATION

B.Tech in Computer Science & Engineering   **RGPV Bhopal, IN** (Aug 2019 – May 2023)

SKILLS
